1 To find linear feet per pound:

12 x SF/LB. divided by width in inches

2 Linear feet in all pounds:

12 x SF/LB. divided by width in inches multiplied by weight

3 Total weight in all linear feet:

Linear feet divided by linear feet per pound

4 Total linear feet for entry on order abstract form:

- a. 250# & over: 12 x SF/# divided by width in inches, multiplied by weight multiplied by 1.15.
- b. 249# & less: 12 x SF/# divided by width in inches, multiplied by weight multiplied by 1.20.
